Power and temperature control disaster recovery planning

# aggreko

## What will you do in an emergency?

Every business is vulnerable to incidents that can prevent normal operations; this could be a flood, fire or power failure. If you've never taken time to consider what might happen in an emergency and how you would deal with it, then you could be heading for trouble. Don't wait for a real-life situation to think about your plan of action.

With a contingency plan, designed and delivered by Aggreko, you are in control. You have a workable plan, available 24/7 that can be rapidly deployed in the event of an emergency.

It is a vital procedure which could not only help your business, but could also potentially save lives.

### Solutions available to you 24/7

With the world's largest fleet of generators, fuel tanks, chillers, cooling towers, heat exchangers, air conditioners and auxiliary equipment, you can be sure that we can support should a disaster occur.

### One call is all it takes

In the event of an emergency, all you need to do is make one call to Aggreko and your power or temperature control contingency plan will be implemented immediately.

### Rapid response

With a dedicated team of coordinators and local service centres across the UK and Ireland, you can be assured that the equipment will be on your site within a few hours - backed by our highly-skilled service engineers.

## Key features:

Our experienced engineers will work with you to:

- Identify potential risks
- Undertake a comprehensive survey of your site's power and temperature control requirements
- Prepare a thorough disaster recovery and emergency management plan to include:
  - identification of suitable equipment
  - selection of a dedicated team
  - detailed instruction of logistics processes and guidelines.
